THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY
Office of the Executive Director

OFFICE MEMORANDUM #8-86

889-15

DIRECTOR, WORLD TRADE
PAI 274
1 W.T.C. 63W

October 20, 1986

PROJECT DIRECTOR
ASBESTOS CONTROL PROGRAM

The Port Authority has had underway an aggressive Asbestos Control Program. The purpose of this program is to inspect Port Authority facilities for the possible presence of asbestos and to prepare an appropriate method for control or removal as required for each occurrence. It is a program to which I attach high priority and one which I follow closely.

In order to make this program even more effective, I am pleased to announce the appointment effective October 27, 1986 of Salvatore Samperi, currently Assistant Director, Economic Development Department, to Assistant Director, Public Safety Department, where he will function as Project Director, Asbestos Control Program. This position will work under the general oversight of the Assistant Executive Director/Capital Programs and report to the Director of Public Safety.

Mr. Samperi will review the individual asbestos control activities of each line department and be given principal responsibility for coordinating the activities of the various Port Authority departments, organizations and contractors who support the Asbestos Control Program. It is expected that this position will provide a single point to which those involved or affected by the Asbestos Control Program can look for assistance.

I know that all departments will extend their fullest cooperation to Sal to ensure that this vital activity is conducted in an effective and safe manner.

Stephen Berger
Executive Director
